

Wholesale 13500-4M500 Auto Spare Part Oil Pump for Nissan

Our Product Introduction

For more products please visit us on automobile-sparepart.com

Basic Information

- Place of Origin: CHINA
- Brand Name: NABO
- Certification: TS16949
- Model Number: 13500-4M500
- Packaging Details: poly bag or air bubble bag, any boxes with customers' label, Corrugated box , Standard tray
- Delivery Time: 3-35 days
- Payment Terms: D/P, L/C, T/T

Product Specification

- Product Name: Oil Pump
- Warranty: 12 Months
- Size: Standard
- Highlight: Nissan Part Oil Pump, 13500-4M500 Oil Pump, Nissan Oil Pump

Product Description

Product Description:

The Essential Role of an Oil Pump in an Internal Combustion Engine

An oil pump plays a **pivotal role** within the inner workings of an internal combustion engine. Its principal purpose is to *perpetuate the circulation of engine oil*. This process is vital as it provides lubrication to the numerous moving components within the engine, significantly reducing friction.

Furthermore, the oil pump maintains a **steady and sufficient flow of oil**, which is crucial for the engine's lubrication needs. Beyond lubrication, this consistent oil supply also aids in cooling the engine, safeguarding it against overheating and the consequential damage that excessive temperatures can cause.

Features:

Optimized Engine Performance with Our Oil Pump

Efficient Oil Circulation

Designed for peak efficiency, our oil pump draws and delivers oil seamlessly from the sump to the engine's critical components. This ensures a reliable and constant flow, lending to superb lubrication that minimizes friction and reduces wear on essential engine parts for a smoother operation.

High-Quality Construction

Crafted with only the finest materials, our oil pump is built from robust cast iron or aluminum. These materials are specially selected for their ability to cope with the intense rigors of engine operation, which includes enduring high temperatures and pressures. This construction not just promises, but delivers lasting performance and unyielding reliability.

Precise and Reliable Operation

At the heart of our oil pump lies precision engineering coupled with superior internal components like gears or rotors. These components are meticulously machined to function smoothly, fostering a steady oil pressure and unfluctuating flow. Such precision guarantees the maintenance of the engine's peak performance.

Enhanced Lubrication and Cooling

Our oil pump's fundamental role is to ensure abundant oil flow for the dual purpose of lubrication and cooling. Adequate lubrication significantly curtails friction and component wear, whereas efficient cooling plays a critical role in heat dispersion. Together they contribute to the engine's durability and operational efficiency.

Rigorous Quality Control

Subjected to stringent testing and quality control, our oil pump is certified to perform up to the mark, honoring both durability and dependable service. Adhering to industry standards, each pump leaves our facility with a warranty, reinforcing your trust and offering the ultimate peace of mind with your investment.

Applications:

Maintain peak functionality and extend the life of your engine by choosing our top-grade oil pump. Our pump is designed to deliver superior oil flow, providing your engine with the necessary lubrication and cooling to operate seamlessly. With our oil pump, you can count on the enduring strength and excellence in performance that your engine needs to remain at its prime.

Invest in the reliability of our high-quality oil pump. Guarantee your engine's efficient circulation of oil, which is essential for proper lubrication and effective cooling. These factors are crucial for the flawless functioning of your vehicle. Depend on our oil pump for maintaining your engine in impeccable condition, ensuring you experience the best performance possible.

Premium Oil Pump for Engine Performance Maintain peak functionality and extend the life of your engine by choosing our top-grade oil pump. Our pump is designed to deliver superior oil flow, providing your engine with the necessary lubrication and cooling to operate seamlessly. FAQ:

1. Who are we?

We are based in Guangzhou, China, start from 2018, we are specilizing in all kinds of spare parts for Japanese cars and Korean cars, for example, engine parts, suspension parts,electric parts, steering parts,transmission parts, body parts. . .

2. How can we guarantee quality?

Always a pre-production sample before mass production;

Always final inspection before shipment.

3. Why should you buy from us from other suppliers?

We have experience in spare parts for more than 10+years

A large of stock

Professional export company

Accept small order

We can design anything well according to customers' requirment
